Infrastructure Security

SIRUSTI INFRASTRUCTURE SERVICES

Business Challenge

- Client's network was down and few PCs were not able to boot up and some others were failed to connect to the domain controller.
- The client chose Sirusti to investigate their network and provide a solution for this.

Solution

Sirusti investigated the problem and found that virus affected the PCs and some PCs were totally affected. Our Infrastructure team formatted affected machines & server and install operating systems with required softwares.

Also, Sirusti installed Symantec End Point protection in all machines including servers.

Exceed our Client's expectation

Sirusti team completed installation and make client's network ready within a day. Client has signed a contract with Sirusti for annual maintenance of their network and PCs.
